

A4-118/6

Acrylic Self Curing Adhesive

Description

A4-118 is a transparent acrylic based self-curing pressure sensitive adhesive that provides high tack and permanent adhesion.

The product has high adhesion, medium cohesion and high tack.

The solvent based adhesive's excellent chemical, heat and water resistant properties ensure long term performance and durability on a variety of common substrates. A4-118 can be applied using a variety of coating methods and is pigmented blue to easily identify application coverage.

A perfect solution for a variety of lamination applications.

Application method(s)

A4-118 can be applied by all normal direct coating techniques such as roller, brush, air knife, knife over roller, roller over roller.

Curing

Self curing due to solvent evaporation.

Usage Notes

Clean equipment with Toluene.

Thinning is not necessary.

Health & Safety

See SDS. If you need a copy of the latest version please contact sales@itac.uk.com.

Packing and Storage

200 litre open top drums and 1000 litre IBC.

Store in a cool dry place between 5°C and 30°C.

Typical properties for this product are given based on ITAC manufacturing experience. They are not a specification of the product.
